As politicians and the media perpetuate the stereotype of the "common criminal," crimes committed by the powerful remain for the most part invisible, or are reframed as a "bad decision" or a "rare mistake." This is a topic that remains marginalized within the field of criminology and criminal justice, yet crimes of the powerful cause more harm, perpetuate more inequalities, and result in more victimization than street crimes.

**Crimes of the Powerful: An introduction** is the first textbook to bring together and show the symbiotic relationships between the related fields of state crime, white-collar crime, corporate crime, financial crime, organized crime, and environmental crime. Dawn L. Rothe and David Kauzlarich introduce the many types of crimes, methodological issues associated with research, theoretical relevance, and issues surrounding regulations and social controls for crimes of the powerful. Themes covered include: media, culture, and the Hollywoodization of crimes of the powerful; theoretical understanding and the study of the crimes of the powerful; a typology of crimes of the powerful with examples and case studies; victims of the crimes of the powerful; the regulation and resistance of elite crime. An ideal introductory text for both undergraduate and postgraduate students taking modules on the crimes of the powerful, white-collar crime, state crime, and green criminology, this text includes chapter summaries, activities and discussion questions, and lists of additional resources including films, websites, and additional readings.

The Galaxy S 5 is Samsung's fifth generation Galaxy S. The Galaxy S5 introduced several new features, such as the fingerprint scanner, a redesigned Photo Studio application, and an improved S Voice assistant. In the last ten years, television has reinvented itself in numerous ways. The demise of the U.S. three-network system, the rise of multi-channel cable and global satellite delivery, changes in regulation policies and ownership rules, technological innovations in screen design, and the development of digital systems like TiVo have combined to transform the practice we call watching tv. If tv refers to the technologies, program forms, government policies, and practices of looking associated with the medium in its classic public service and three-network age, it appears that we are now entering a new phase of television. Exploring these changes, the essays in this collection consider the future of television in the United States and Europe and the scholarship and activism focused on it. With historical, critical, and speculative essays by some of the leading television and media scholars, *Television after TV* examines both commercial and public service traditions and evaluates their dual (and some say merging) fates in our global, digital culture of convergence. The essays explore a broad range of topics, including contemporary programming and advertising strategies, the use of television and the Internet among diasporic and minority populations, the innovations of new technologies like TiVo, the rise of program forms from reality tv to lifestyle programs, television's changing role in public places and at home, the Internet's use as a means of social activism, and television's role in education and the arts. In dialogue with previous media theorists and historians, the contributors collectively rethink the goals of media scholarship, pointing toward new ways of accounting for television's past, present, and future. Contributors. William Boddy, Charlotte Brunson, John T. Caldwell, Michael Curtin, Julie D'Acci, Anna Everett, Jostein Gripsrud, John Hartley, Anna McCarthy, David Morley, Jan Olsson, Priscilla Peña Ovalle, Lisa Parks, Jeffrey Sconce, Lynn Spigel, William Uricchio

The yearly volumes of *Censored*, in continuous publication since 1976 and since 1995 available through Seven Stories Press, is dedicated to the stories that ought to be top features on the nightly news, but that are missing because of media bias and self-censorship. The top stories are listed democratically in order of importance according to students, faculty, and a national panel of judges. Each of the top stories is presented at length, alongside updates from the investigative reporters who broke the stories. The contributors show that digital media are disrupting entire media industries, but without erasing the past and insist that one media sector is not the same as the next. As the title signals even in the age of convergence and remix culture, different media continue to display their own distinctive political economies.

Balancing provocative criticism with clear explanations of complex ideas, this student-friendly introduction investigates the crucial role global entertainment media has played in the emergence of transitional capitalism.
