This book gathers selected research papers presented at the First International Conference on Digital Technologies and Applications (ICDTA 21), held at Sidi Mohamed Ben Abdellah University, Fez, Morocco, on 29-30 January 2021. highlighting the latest innovations in digital technologies as: artificial intelligence, Internet of things, embedded systems, network technology, information processing, and their applications in several areas such as hybrid vehicles, renewable energy, robotic, and COVID-19. The respective papers encourage and inspire researchers, industry professionals, and policymakers to put these methods into practice. These notes treat of the Leaving Certificate Higher Level Economics course. The coverage is as short and concise as possible to aid the student's learning. It was necessary to omit certain topics such as population economics and development, however all omissions concern material which is not central to the course or an understanding of economics. As such, these notes form the minimum course of economics required to get an A1 in the Irish Leaving Certificate, or at least to do very well. It is important

to note that these notes should be utilised in conjunction with past papers and past marking schemes in order to maximise examination performance.

Topics covered include: - Reading comprehension answering style - Personal Writing - Functional writing - Media Studies: Colour Associations Exam papers available at examinations.ie, courtesy of the State Examinations Commission.

These notes treat of the Leaving Certificate Physics course. Only the most important parts of any topic are included; as such, these notes form 'the minimum you need to know to get an A1'. Clear diagrams are included to illustrate important material in the text, especially in Light 1: Geometrical Optics with its inherently graphical nature. It is important to note that significant emphasis is placed on the theoretical part of the syllabus: each student's own experiment copybook should be their keystone for that aspect of the course. However, for the sake of completeness appendix B forms a concise

overview of the mandatory experiments, with particular emphasis on those salient points which frequently crop up in exams. Moreover, the Applied Electricity option has been omitted since seldom do students warm to it, and indeed very few teachers cover it; the particle physics option is included instead in the Modern Physics section.
