When we think of American terrorism, it is modern, individual terrorists such as Timothy McVeigh that typically spring to mind. But terrorism has existed in America since the earliest days of the colonies, when small groups participated in organized and unlawful violence in the hope of creating a state of fear for their own political purposes. Using case studies of groups such as the Green Mountain Boys, the Molly Maguires, and the North Carolina Regulators, as well as the more widely-known Sons of Liberty and the Ku Klux Klan, Robert Kumamoto introduces readers to the long history of terrorist activity in America. Sure to incite discussion and curiosity in anyone studying terrorism or early America, *The Historical Origins of Terrorism in America* brings together some of the most radical groups of the American past to show that a technique that we associate with modern atrocity actually has roots much farther back in the country's national psyche.

Twenty Irish immigrants, suspected of belonging to a secret terrorist organization called the Molly Maguires, were executed in Pennsylvania in the 1870s for the murder of sixteen men. Ever since, there has been enormous disagreement over who the Molly Maguires were, what they did, and why they did it, as virtually everything we now know about the Molly Maguires is based on hostile descriptions of their contemporaries. Arguing that such sources are inadequate to serve as the basis for a factual narrative, *Making Sense of the Molly Maguires* examines the ideology behind the contemporary evidence to explain how and why a particular meaning came to be associated with the Molly Maguires in Ireland and Pennsylvania. At the same time, this book examines new archival evidence from Ireland that establishes that the

American Molly Maguires were a rare transatlantic strand of the violent protest endemic in the Irish countryside. Combining social and cultural history, *Making Sense of the Molly Maguires* offers a new explanation of who the Molly Maguires were, as well as why people wrote and believed such curious things about them. In the process, it vividly retells one of the classic stories of American labor and immigration.

This report focuses on national standards designed to improve delinquency prevention efforts and the juvenile justice system. The set of standards and goals on juvenile justice and delinquency prevention is designed to play a significant role in the national effort to reduce criminality and encourage a consistent jurisprudence for youth. Standards are included on most aspects of the juvenile justice system, including delinquency prevention, organization and coordination of delinquency prevention programs, police roles and responsibilities in the juvenile justice system, jurisdiction and processes of the juvenile court, and the adjudication process. Also covered are standards on endangered children, dispositions, prosecution and defense services, intake and correctional services, and planning and evaluation in the juvenile justice system.

In this anecdote-rich narrative, the author of "Mind Power Into the 21st Century" takes readers on his personal journey to the remote corners of the world as he seeks to unlock the mystery of happiness. Two-color throughout.

Education plays a vitally important role in building foundations for social progress. This remarkable collection describes educational models based on the principles of

During the mid-nineteenth century, Americans created the functional equivalent of earlier state religious establishments. Supported by mandatory taxation, purportedly inclusive, and vested with messianic promise, public schooling, like the earlier established churches, was touted as a bulwark of the Republic and as an essential agent of moral and civic virtue. As was the case with dissenters from early American established churches, some citizens and religious minorities have dissented from the public school system, what historian Sidney Mead calls the country's «established

church.» They have objected to the «orthodoxy» of the public school, compulsory taxation, and attempts to abolish their schools or bring them into conformity with the state school paradigm. The Dissenting Tradition in American Education recounts episodes of Catholic and Protestant nonconformity since the inception of public education, including the creation of Catholic and Protestant schools, homeschooling, conflicts regarding regulation of nonconforming schools, and controversy about the propositions of knowledge and dispositions of belief and value sanctioned by the state school. Such dissent suggests that Americans consider disestablishing the public school and ponder means of education more suited to their confessional pluralism and commitments to freedom of conscience, parental liberty, and educational justice. Vols. 8-10 of the 1965-1984 master cumulation constitute a title index.

Harness the Power of Your Laugh! Good news! You can laugh every day, no matter what is happening in the world. Even if you are very busy with life, you only need a few minutes a day, and you will discover that laughing is like a nourishing food. We need to actively and consciously laugh every day to give our bodies the best opportunity to grow strongly, happily, and healthily. The best news is that laughing is a deep-breathing technique. Much scientific research has been done over recent years on cell oxygenation and disease. Nobel Prize winner Dr Otto Warburg, president of the Institute of Cell Physiology, says: “Deep breathing techniques increase oxygen to the cells and are the most important factors in living a disease-free and energetic life.” Dr

Times have changed for regional economic development. Back in the not-too-far-off good old days, announcements of a new factory setting up in town or the approval granted for a new large apartment block would have been widely accepted and even applauded by communities. Now mostly they are not. NIMBY has become the standard cry. Not in my backyard now extends to so many areas beyond nuclear power plants, mines and waste dumps, including to some that at first sight seem just plain puzzling. But this is the 21st Century reality and regional economic development policy and practice must respond with more sophisticated analysis and tools. Setting up a camp to rival the NIMBYs and waging war to win the media battle is a short sighted, unsustainable approach. This book analyses what makes NIMBY tick, surveys current best practice regional economic development and posits a coherent, sustainable approach to the creation of wealth and well-being in communities.

Intended for federal, state, and local policymakers in the area of criminal justice research and development, this report includes guidelines for improvement of the quality, relevance, and utilization of research results. In order to cover these issues, part two of this report focuses respectively on the needs of research and development policymakers who fund criminal justice research and development, researchers who

conduct research and development, and practitioners who put research and development results into use. Guidelines and principles are proposed which should assist policymakers at all levels of government. However, some topics tend to be addressed more to the federal level, where major research and development decisions are often made. The first chapter of this part presents a detailed discussion of institutional support for criminal justice research and development. It describes the federal role in supporting this effort, focusing on who the agencies are, the extent of their involvement, and how the principal agencies are organized to manage their research and development programs. Recommendations regarding the research and development management activities of criminal justice funding agencies are included. Several important issues in the conduct of criminal justice research and development are examined in the second chapter. Among the topics discussed are constraints on research, ethical issues, research designs and methodologies, prerequisites for sound planning and project selection, ways of maintaining the confidentiality of data, and ways of making data more easily available for research and statistical purposes. The final chapter of this section discusses research and development utilization practices and the assumptions underlying current policies in this area. A criticism of these policies and recommendations for new strategies is presented. The final part of this report provides an analysis of the kinds of problems often encountered in research and development. Three general types of criminal justice research and development are

discussed: technology (e.g., hardware) research, research on problems of criminal justice organizations (e.g., arrest, prosecution, sentencing, and parole), and research on new criminal justice problems. For each type of research and development, the relevant issues and recommendations are discussed. Most of these, however, still related to either the support or conduct of research and development. The report also attempts to provide concrete illustrative examples by raising the relevant issues in the context of crime prevention at commercial and residential sites (technology research), sentencing (research on problems of criminal justice organizations), and problems of the victim (research on new criminal justice problems).

Nigeria, a country under a military regime for several years, transitioned to a civilian regime in May 1999. Since this change, violent conflicts between Christians and Muslims have continued to erupt. They constitute one of the gravest dangers facing Nigeria, a country with a population of 189 million people. What have Nigerian religious leaders done about this situation, especially in educational circles? Have they received formal educational training to understand the causes of this violence and especially how to provide alternatives for more peaceful relations within Nigeria? Does the current educational system in Nigeria provide the main ingredients for the promotion of a culture of peace? The absence and neglect of interreligious peace education as part of a peace education core program and the lack of an interreligious curriculum for peace education in the training of religious leaders are the two problems contributing

towards the lack of effectiveness of religious leaders in promoting less violent and more peaceful living. The solution to the problem is proposed in this book entitled Interreligious Curriculum for Peace Education in Nigeria. The book develops a one-year curriculum, building on Yoruba, Islamic & Christian conceptions of peace, and teaches how to create safe, caring, spiritual, peaceful and successful interfaith relationships between all Nigerian religious communities. In the long term, the book helps to educate religious leaders to contribute, in themselves and with the help of their respective religious communities, to reducing the growing religious violence in Nigeria.

For many scholars, the study of community and community development is at a crossroads. Previously dynamic theories appear not to have kept pace with the major social changes of our day. Given our constantly shifting social reality we need new ideas and research that pushes the boundaries of our extant community theories. Theory, Practice, and Community Development stretches the traditional boundaries and applications of well-established community development theory, and establishes new theoretical approaches rooted in new disciplines and new perspectives on community development. Expanded from a special issue of the journal Community Development, Theory, Practice, and
