The 2nd edition of Encyclopedia of Violence, Peace and Conflict provides timely and useful information about antagonism and reconciliation in all contexts of public and personal life. Building on the highly-regarded 1st edition (1999), and publishing at a time of seemingly inexorably increasing conflict and violent behaviour the world over, the Encyclopedia is an essential reference for students and scholars working in the field of peace and conflict resolution studies, and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change. Covering topics as diverse as Arms Control, Peace Movements, Child Abuse, Folklore, Terrorism and Political Assassinations, the Encyclopedia comprehensively addresses an extensive information area in 225 multi-disciplinary, cross-referenced and authoritatively authored articles. In his Preface to the 1st edition, Editor-in-Chief Lester Kurtz wrote: "The problem of violence poses such a monumental challenge at the end of the 20th century that it is surprising we have addressed it so inadequately. We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully. Instead, we have increased the lethality of our combat through revolutions in weapons technology and military training. The Encyclopedia of Violence, Peace, and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena." Ten years on, the need for an authoritative and cross-disciplinary approach to the great issues of violence and peace seems greater than ever. More than 200 authoritative multidisciplinary articles in a 3-volume set Many brand-new articles alongside revised and updated content from the First Edition Article outline and glossary of key terms at the beginning of each article Entries arranged alphabetically for easy access Articles written by more than 200 eminent contributors from around the world

Multiculturalism is higher on the daily political agenda than it has ever been. Leading politicians and public commentators speak with an unparalleled bluntness about the perceived limitations of multiculturalism while representatives of cultural, minorities express concern about marginalisation. This debate is taking place against a background of fear about terrorism, the integrity of national identities and a loosely construed 'clash of civilizations'. Secularism is pitted against religious fundamentalism, respect for difference against the right of freedom of speech, integration against self-determination, and duties of citizenship against minority rights. This book confronts the reality of moral conflict in the debate on multiculturalism while resisting the simplification which too frequently accompanies daily commentary on both sides of an increasingly polarised debate. The volume as a whole marks an important step in the attempt to examine the underlying concepts, of the nature and legitimate extent of disagreement, of secularism, the nature of

power, the state and citizenship, which inevitably constitute key assumptions in the debate. Bringing together leading scholars on multiculturalism: Gerald Gaus, Peter Jones, John Horton, Tariq Modood, Chandran Kukathas, Bhikhu Parekh, Matthew Festenstein and Cecile Laborde, this book discusses the latest developments in the field. It will be of strong interest students and scholars of multiculturalism, political science, political theory, international relations, sociology, philosophy and anthropology.

An interaction between biblical studies and communication studies that demonstrates how understanding situations of conflict in the Bible can help develop skills in dealing with conflict today. Each of eleven chapters presents a biblical story (from Adam and Eve through the letters of Paul) that examines some aspect of conflict intrapersonal, interpersonal, or between humans and God. Each chapter takes up a particular theme the nature of conflict, the role of identity, the need for forgiveness, the use of power, the potential of mediation, the skills of negotiation, the possibility of reconciliation with the goal of helping students learn how to be in right relationship with one another and with God. Each chapter includes discussion questions, suggested readings, and sidebars to form an attractive text for undergraduates and general readers. Scholarship on the psychology of peace has been accumulating for decades. The approach employed has been predominantly centered on addressing and preventing conflict and violence and less on the conditions associated with promoting peace. Concerns around nuclear annihilation, enemy images, discrimination, denial of basic human needs, terrorism and torture have been the focal points of most research. *The Psychological Components of a Sustainable Peace* moves beyond a prevention-orientation to the study of the conditions for increasing the probabilities for sustainable, cooperative peace. Such a view combines preventative scholarship with a promotive-orientation to the study of peaceful situations and societies. The contributors to this volume examine the components of various psychological theories that contribute to the promotion of a harmonious, sustainable peace. Underlying this orientation is the belief that promoting the ideas and actions which can lead to a sustainable, harmonious peace will not only contribute to the prevention of war, but will also lead to more positive, constructive relations among people and nations and to a more sustainable planet. *The Psychological Components of a Sustainable Peace* is valuable and stimulating reading for researchers in peace psychology, political psychology, and conflict resolution as well as others who are interested in developing a sustainable, harmonious world.

This book explores the ethical dimension of peacebuilding. In the aftermath of the Cold War the hope for a more stable and just international order was rapidly dissolved by the internecine conflicts that plagued all continents. The Rwanda and Srebrenica genocides demonstrated the challenge of promoting peace in a world increasingly defined by intra-state conflict and sub-national groups confronting nation-states. Murithi interrogates the role that ethics plays in promoting and consolidating peacebuilding and presents a synthesis of moral philosophy and international relations and an analysis of the ethics of negotiation, mediation, forgiveness and reconciliation. In its attempt to explore the extent to which ethical concerns influence and inform peacebuilding this book contributes to a growing body of literature on ethics and international relations which will enable students, scholars and practitioners to ground their understanding of a principled peacebuilding.

The US's once-enthusiastic commitment to restore trustworthy relations with the Muslim world has dwindled considerably since Barack Obama's 2009 "New Beginning" address in Cairo. *Beyond Cairo* examines US diplomacy in the years following this speech and explores Washington's lagging engagement with the Muslim world. This book tackles the problems with public diplomacy as the US has been practicing it and provides a roadmap for the US to re-engage the Muslim world over the coming years.

In an original synthesis of communication theory and their own research and experience as intervention agents, the authors of *Moral Conflict* describe a dialectical tension between the expression and suppression of conflict that can be transcended in ways that lead to personal growth and productive patterns of social action. Several projects are described as practical examples of these ways of working.

Contemporary societies are riddled with moral disputes caused by conflicts between value claims competing for the regulation of matters of public concern. This familiar state of affairs is relevant for one of the most important debates within liberal political thought: should institutions seek to realize justice or peace? Justice-driven philosophers characterize the normative conditions for the resolution of value conflicts through the establishment of a moral consensus on an order of priority between competing value claims. Peace-driven philosophers have concentrated, perhaps more modestly, on the characterization of the ways in which competing value claims should be balanced, with a view to establishing a *modus vivendi* aimed at containing the conflict. Interactive Justice addresses an important question related to this debate: on what terms should the parties interact during their conflict for their interaction to be morally acceptable to them? Although largely unexplored by political philosophers, this is a main area of concern in conflict management. Building on a proceduralist interpretation of "relational" concerns of justice, the author develops a liberal normative theory of interactive justice for the management of value conflict in politics grounded in the fundamental values of fair hearing and procedural equality. This book innovatively builds a bridge between works in political philosophy and peace studies to propose a fresh lens through which to view the normative responses liberal institutions ought to give to value conflict in politics, and moves beyond the apparent dichotomy between pursuing end-state justice through conflict resolution or peace through conflict containment.

The Handbook of Intergroup Communication brings together research, theory and application on traditional as well as innovative intergroup situations, exploring the communication aspect of these groups. The volume is organized into four domains – cross-disciplinary approaches to intergroup study; types/processes of communication between groups; communication between specific group types; and arenas in which intergroup communication takes place. Editor Howard Giles worked with an internationally-based advisory board to develop and review content, and the contributors included here represent those scholars doing innovative and well-regarded work around the globe. The "intergroup" umbrella integrates and transcends many traditional conceptual boundaries in communication (including media, health, intercultural, organizational); hence the Handbook will appeal to scholars and graduate students not only in the core area of intergroup communication itself, but across varying terrains of study in communication and beyond, including intergroup relations and social psychology.

This latest book by one the world's leading protagonists in the field will be welcomed not just by psychologists but by students, academics and professionals interested in social constructionism across a wide range of subjects. Social Construction in Context explores the potentials of social constructionist theory when placed in diverse intellectual and practical contexts. It demonstrates the achievements of social constructionism, and what it can now offer various fields of inquiry, both academic, professional and applied, given the proliferation of the theory across the social sciences and humanities. First order issues of concern within the academic world, objectivity, truth, power and ideology, are now being augmented by widespread developments in practice - therapeutic, pedagogical, organizational and political. This book looks closely at these developments and examines both the positive potentials and limitations of social constructionist theory when applied to a variety of domains. It has been written in an accessible and scholarly manner making it suitable for a wide-ranging readership.

Written from the authors' experience in conflict intervention in their private consulting practice, Engaging Communication in Conflict uses a communication perspective to address insights and methods in private mediation, small group facilitation, system design, large-scale interventions, and public-issue management. This book offers encouragement for a world sometimes overwhelmed by conflict and presents an expanded and pragmatic definition of peace. Stephen Littlejohn and Kathy Domenici discuss numerous methods and principles in conflict resolution. They explore transformative mediation, the team mediation system, assessment and evaluation, systemic design, gaming methodology, issue framing and public deliberation, study circles, dialogue groups, and many other interventions. These methods and principles are adapted from a spectrum of theory and practice and include fresh and innovative approaches designed by the authors and their colleagues.

This innovative introduction to research in the social sciences guides students and new researchers through the maze of research traditions, cultures of inquiry and epistemological frameworks. It introduces the underlying logic of ten cultures of inquiry: ethnography; quantitative behavioral science; phenomenology; action research; hermeneutics; evaluation research; feminist research; critical social science; historical-comparative research; and theoretical research. It clarifies conceptual and intellectual traditions in research, and puts researchers firmly in the investigative saddle - able to choose, justify, and explain the intellectual framework and personal rationale of their research.

The Encyclopedia of Communication Theory provides students and researchers with a comprehensive two-volume overview of contemporary communication theory. Reference librarians report that students frequently approach them seeking a source that will provide them with a quick overview of a particular theory or theorist - just enough to help them grasp the general concept or theory and its relation to the discipline as a whole. Communication scholars and teachers also occasionally need a quick reference for theories. Edited by the co-authors of the best-selling textbook on communication theory and drawing on the expertise of an advisory board of 10 international scholars and nearly 200 contributors from 10 countries, this work finally provides such a resource. More than 300 entries address topics related not only to paradigms, traditions, and schools, but also metatheory, methodology, inquiry, and applications and contexts. Entries cover several orientations, including psycho-cognitive; social-interactional; cybernetic and systems; cultural; critical; feminist; philosophical; rhetorical; semiotic, linguistic, and discursive; and non-Western. Concepts relate to interpersonal communication, groups and

organizations, and media and mass communication. In sum, this encyclopedia offers the student of communication a sense of the history, development, and current status of the discipline, with an emphasis on the theories that comprise it.

Conflict is inherent in virtually every aspect of human relations, from sport to parliamentary democracy, from fashion in the arts to paradigmatic challenges in the sciences, and from economic activity to intimate relationships. Yet, it can become among the most serious social problems humans face when it loses its constructive features and becomes protracted over time with no obvious means of resolution. This book addresses the subject of intractable social conflict from a new vantage point. Here, these types of conflict represent self-organizing phenomena, emerging quite naturally from the ongoing dynamics in human interaction at any scale—from the interpersonal to the international. Using the universal language and computational framework of nonlinear dynamical systems theory in combination with recent insights from social psychology, intractable conflict is understood as a system locked in special attractor states that constrain the thoughts and actions of the parties to the conflict. The emergence and maintenance of attractors for conflict can be described by means of formal models that incorporate the results of computer simulations, experiments, field research, and archival analyses. Multi-disciplinary research reflecting these approaches provides encouraging support for the dynamical systems perspective. Importantly, this text presents new views on conflict resolution. In contrast to traditional approaches that tend to focus on basic, short-lived cause-effect relations, the dynamical perspective emphasizes the temporal patterns and potential for emergence in destructive relations. Attractor deconstruction entails restoring complexity to a conflict scenario by isolating elements or changing the feedback loops among them. The creation of a latent attractor trades on the tendency toward multi-stability in dynamical systems and entails the consolidation of incongruent (positive) elements into a coherent structure. In the bifurcation scenario, factors are identified that can change the number and types of attractors in a conflict scenario. The implementation of these strategies may hold the key to unlocking intractable conflict, creating the potential for constructive social relations.

Communicating Ethically provides a broad introduction to the ethical nature of communication. Now in its second edition, the text has been revised to further address current issues, such as: evolving social media and digital platforms, growing cultural communication and discussion of diversity, and the ethics of public discourse. This book combines coverage of the major systems of ethical reasoning with applications, including case studies in each chapter, to investigate ethics within many fields in the communication discipline. Incorporating a simple framework for ethical reasoning allows the reader to develop their own understanding of the various criteria for making ethical judgments. The SAGE Handbook of Conflict Communication: Integrating Theory, Research, and Practice is the first resource to synthesize key theories, research, and practices of conflict communication in a variety of contexts. Editors John Oetzel and Stella Ting-Toomey, as well as expert researchers in the field, emphasize constructive conflict management from a communication perspective which places primacy in the message as the focus of conflict research and practice.

Although necessary and often first rate, technocratic solutions alone have been ineffective in delivering real change or lasting results in governance reforms. This is primarily because reform programs are delivered not in controlled environments, but under complex, diverse, sociopolitical and economic conditions. Real-world conditions. In political societies, ownership of reform programs by the entire country cannot be assumed, public opinion will not necessarily be benign, and coalitions of support may be scarce or nonexistent, even when intended reforms really will benefit those who need them most. While the development community has the technical tools to address governance challenges, experience shows that technical solutions are often insufficient. Difficulties arise when attempts are made to apply what are often excellent technical solutions. Human beings—either acting alone or in groups small and large—are not as amenable as are pure numbers, and they cannot be ignored. In the real world, reforms will not succeed, and they will certainly not be sustained, without the correct alignment of citizens, stakeholders, and voice. 'Governance Reform under Real-World Conditions: Citizens, Stakeholders, and Voice' is a contribution to efforts to improve governance systems around the world, particularly in developing countries. The contributors, who are academics and development practitioners, provide a range of theoretical frameworks and innovative approaches and techniques for dealing with the most important nontechnical or adaptive challenges that impede the success and sustainability of reform efforts. The editors and contributors hope that this book will be a useful guide for governments, think tanks, civil society organizations, and development agencies working to improve the ways in which governance reforms are implemented around the world.

Social Justice and Communication Scholarship explores the role of communication in framing and contributing to issues of social justice. This collection, a first on the subject of communication and social justice, investigates the theoretical and practical ways in which communication scholarship can enable inclusive and equitable communities within American society. It analyzes ways in which to construct communities that protect individual freedom while ensuring equality and dignity to everyone. In this unique anthology, Swartz brings together both senior scholars and junior colleagues to represent diverse applications of communication to issues of social justice. He supports partisan scholarship in order to revitalize intellectual activity and social commitment toward creating a progressive society. As a result; the volume serves the heuristic function of posing new research questions. In addition to its relevance within the field of communication, Social Justice and Communication Scholarship will be of interest in many of the humanities and social sciences, as research on the theme of social justice transcends disciplinary boundaries. The volume is particularly well suited for use in undergraduate and graduate courses in communication, rhetoric and composition, journalism, American studies, and cultural studies.
