Solar is a subject that increasingly interests, yet one about which competent independent advice is difficult to obtain. Collyn Rivers totally revised new edition of his earlier and separate caravan and motorhome editions of *Solar That Really Works!* fills a previously all but unexplored need. In one tightly written book, Collyn covers all that is needed to design and install solar electrical systems in anything from a tiny caravan or campervan to a large fishing lodge. Along the way it takes in the specialised needs of big converted coaches and the increasingly accepted fifth-wheeler caravans. *Solar That Really Works!* covers just what can and cannot realistically be run from a typical solar installation. It shows how to calculate the energy required, shows simple ways of finding out the most probable solar energy available anywhere and anytime in Australia and New Zealand. It shows also how much solar panels really do produce. The book also includes full and often illustrated instructions on how to install systems and their various components. As with Collyn's books generally, the writer leaves nothing that the reader is expected to take on trust. He not only explains, in simple English, the 'how' of things, he also explains the 'whys'. Here, for the first time for many people (including equipment vendors) is why a solar panel typically produces only 70% of what it says on the box. And why this one especially catches out even science teachers. *Solar That Really Works!* also introduces the author's totally new approach to choosing the correct cable size without the need for often misleading and complex wire tables.

Travelling to North Africa and touring Morocco in your campervan or motorhome couldn't be easier with *Motorhome Morocco*. Get this English-language guidebook to answer your questions on entering the country, travelling it safely, finding campsites, taking your dog, buying essentials, visiting some of the best sights and handling the language. It includes photographs from across Morocco - colour in the eBook, black & white in printed copies - to give you an idea of the incredible landscapes, wonderful people and vibrant towns and cities you'll find there. For a country that's closer to Spain than France is to England, Morocco is so very different to Europe, but such a great adventure. We toured the country in our motorhome in 2012 and again in 2017, spending four months there in total. After our first tour we wrote a book about our experiences and what we learned, to help you to get there and have a great adventure too. We travelled in winter on both tours and crossed the Rif, Middle Atlas, High Atlas and Anti-Atlas Mountains, visited the incredible cities of Fes, Meknes and Marrakech and slept on the edge of the Sahara desert near Algeria. We bartered and haggled and came away with some great bargains and many, many happy memories. The book focuses on the practical, first hand experience we gained on taking our motorhome to Morocco. It covers topics such as: Buying ferry tickets in Spain An easy step-by-step guide to entering and leaving Morocco Insurance Driving a motorhome in Morocco How to buy things, when to haggle and when not to Coping with breakdowns How to find places to stay Our experience of taking our dog to Africa Confusing aspects of Moroccan life, and how to cope with them What campsites and guarded parking overnight locations we used We didn't use an organised tour company for either trip, so we saved ourselves thousands of pounds and gave ourselves the freedom to explore this amazing country at our own pace. We hope our book will inspire you to do the same. For more information about our time in Morocco, including more photos and videos, please visit our website: www.ourtour.co.uk. Thanks, Julie and Jason

The *MOTORHOMES Coloring and Drawing Books for Children from 3 to 8 Years* is one of the vehicles books that you can find in our series of coloring books. They are the best coloring books for children, the only coloring books for children that combine modern motorhoms with vintage and very old recreational vehicles. But here is the special thing... This coloring book not only entertains the child who has to color the shapes and white spaces of all the motorhomes drawn, but it does much more: in fact, the wheels and some parts of the motorhomes are drawn with a dotted line that the child has to go through again. So, children can also have fun drawing and try to develop in this way both the ability to color the illustrations and the basics of the drawing (reviewing the dotted lines on the drawings). In this coloring book with trains, there are 15 different motorhomes to color and draw. If your child is a recreational vehicles enthusiast he is 100% sure that he will have a great time. Each page is large, A4 (8.5 x 11 inches) and is printed with the highest quality, forming a super sharp image that every child will surely enjoy coloring. Each coloring page is printed only on one side of each sheet to prevent the color from fading or passing through the sheet while your child exercises his creativity without limits. This coloring book with motorhomes is more suitable for children between 3 and 8 years old, but it is also suitable for any child who loves or has a great passion for: Motorhomes Recreational Vehicles Means of transport Car or Buses RV's vehicles or Motor coach Camper, caravan and camping cars etc.. If you want to entertain your child with

an original coloring book and try to introduce him to the basics of drawing and sketching in a much more fun and exciting way, this is the right book. Remember this: in our coloring book series you can also find the coloring book dedicated to buses, cars, double-decker buses (there are some beautiful ones) and a lot of other albums with different vehicles. You can also order them together and give them an even bigger surprise. Caravan & Motorhome Electrics is the totally rewritten successor of the original globally selling Motorhome Electrics. The book's content now also covers every aspect of designing, installing and fault finding of the electrics in fifth wheel and conventional caravans and camper trailers. The book explains how things work, and what they do (not what vendors claim they do). It shows how to dramatically improve charging performance, successfully install solar, and reduce energy draw of electric (especially) three-way fridges. Essentially it provides solutions proven to work, not suggestions that may work. The author shows how the ongoing move fully voltage controlled alternators necessitates dc-dc alternator charging. And that, post 2016, regulations are likely to limit or even preclude alternator charging with new vehicles. It covers the solutions in depth: i.e. solar, plus fuel cell's 24/7 power generation (light and compact yet silent and non-polluting (and now existing in LPG form), needing only a small battery for peak loads. As with all Collyn's books, the content is thoroughly researched, technically accurate, yet in plain English, plus explanatory illustrations, many of the author's own vehicles. The author's background includes automobile research, electronics and large scale magazine publishing (including founding the world's largest electronics magazine). He was technical editor of Australia's The Bulletin magazine in the 1980s - and has supplied Tech Notes to The Wanderer for a now 14 years.

Discusses all aspects of RVing including types of recreational vehicles, costs, handling, campgrounds, and campground hookups

Using a rich wealth of visual material and stories from owners around the world, Home Away from Home looks at the world of camper vans and motorhomes from Airstream to Winnebago, via the ubiquitous VW bus. Lars Eriksen and Kate Trant outline the cultural and social history of the camper van and motorhome in the USA, UK and Europe, looking at a range of phenomena from surf and hippy culture, to family holidays and travel in retirement years. A range of vehicles from recent decades is presented in detail, within the context of their technical development as well as the design strategies that dictated their appearances. Whether about a pioneering spirit, large horizons and wide open spaces, economic travel or a comfortable change of scenery, what is common to camper vans and motorhomes is the need to create a 'home away from home.' This book illustrates the culture of camper van and motorhome travel by looking at the owners and their clubs, telling stories of road trips, adventures and epic voyages.

The illustrated history of the motorhome (motor caravan/camper/auto-sleeper) in the UK from earliest pioneers to present day. Be it micro motorhomes, American giants or something in-between, this book tells the story of the motorhome and its industry over the last 90 years. Includes rare images.

THOSE MARVELOUS LITTLE TOYOTA MOTORHOMES is all about Toyota motorhomes in general and a 1977 Toyota Pont-X motorhome named Little House in particular. Between the mid-1970 and 1994, over thirty motorhome manufactures mounted motorhomes on Toyota cabs and chassis with many different models available from about 161/2- to 23-foot in length. experience as follows: "Little House has given me a lot of Free Being traveling for relatively little money. This is traveling that I would not otherwise have been able to afford. During this traveling, I have been able to see things and do things that I would not otherwise have experienced. A Toyota motorhome made all this possible."
