

Simplified Chinese edition of The Next Millionaire Next Door: Enduring Strategies for Building Wealth

A #1 New York Times bestseller “This little mouse may well inspire some big dreams.” —Kirkus Reviews “In this picture book based on the space shuttle Endeavor...Meteor is one of the smallest mice, but the most hardworking...the values of being small, useful, solving problems, and working hard—as opposed to being big and strong—will inspire young readers.” —School Library Journal “Inspired by this real-life mouse, Kelly’s first children’s book tells the story of Meteor, a lightly anthropomorphized rodent who turns his tininess into an advantage when an important key gets stuck in a crack between two monitors...textured images and vivid portraits that make it absolutely clear that space travel is a larger-than-life adventure.” —Publishers Weekly A heartwarming picture book tale of the power of the small, from bestselling author and retired NASA astronaut Commander Mark Kelly. Astronaut Mark Kelly flew with “mice-tronauts” on his first spaceflight aboard space shuttle Endeavour in 2001. Mousetronaut tells the story of a small mouse that wants nothing more than to travel to outer space. The little mouse works as hard as the bigger mice to show readiness for the mission . . . and is chosen for the flight! While in space, the astronauts are busy with their mission when disaster strikes—and only the smallest member of the crew can save the day. With lively illustrations by award-winning artist C. F. Payne, Mousetronaut is a charming tale of perseverance, courage, and the importance of the small! After a day of misadventures, Curious George becomes the first space monkey.

When will humans return to the moon? When will we land on Mars? Looking ahead, see how space heroes struggled to survive in outer space half a century ago, challenging the limits of technology with wisdom and courage. In April 1970, during the heyday of the Apollo space program, the Aerospace Administration sent Lowell and three others to fly the Apollo 13 for the third moon landing mission in the United States. On the third day of the mission, an unexplained explosion severely damaged the spacecraft, causing a large amount of oxygen and power loss, and the astronauts were forced to enter the lunar module for temporary shelter. The focus of the story is not only the spacecraft, but also the dedication of the control center personnel, and the stories of Lowell's relatives.

When Albert and his buddies have a "no girls" baseball game, Frances and her sister organize a "Best Friends Outing -- No Boys."

Reimagines the cycles of the moon as a mother bakes a Big Moon Cookie and, despite Mama's request to wait, Little Star begins nibbling at it every night.

Won The Royal Society Young People's Book Prize in 2013. Designed for preschool children, the basic knowledge of traveling in space starts from the first page turning. Pre-departure training for Jedi Rescue, start! Super-attractive fantasy space children's book! There are so many page-turning mechanisms in the whole book, which make people immersed in the surprise of exploring and discovering the secrets of the universe. -The RS Award selection team will come and follow this fascinating flip book.
