assignments and critical thinking exercises to prepare you for the simulation experience; access to patient data with a shift report and fully-functional electronic medical record (EMR); post-simulation exercises including charting and documentation activities in the EMR, reflective journaling, and concept mapping; and review resources including animations, videos, and textbook references. Simulation with the SLS is a complete learning experience that bridges the gap between lecture and clinicals to prepare you for the real world of nursing.

The first edition of Wong's Nursing Care of Infants and Children adapted for Australia and New Zealand offers comprehensive coverage of all aspects of infant, child and adolescent health for student nurses. With input from leading local expert paediatric clinicians and academics, the text covers child and adolescent anatomy and physiology, mental health, nursing care guidelines, critical thinking, family-centred care, rural and remote health, cultural, ethical and legal considerations, and common presenting conditions. This trusted text is ideal for all students with an interest in paediatric nursing. It aligns with local professional standards, health policies, legal and ethical considerations and population data.

- Well-established, comprehensive text meeting students' core learning needs
- Covers all aspects of infant, child and adolescent health through an assessment and management approach
- Nursing care guidelines and plans with step-by-step instructions to aid understanding
- Comprehensive Nursing Considerations throughout every chapter to assist with a range of nursing situations/environments
- Aligned to National Safety and Quality Health Service (NSQHS) Standards
- Cultural tips and examples from Maori, First Nations People and migrant populations throughout to reflect Australian and New Zealand society
- Elsevier Adaptive Quizzing for Wong's Nursing Care of Infants and Children, ANZ 1st Edition included in all print purchases. Corresponding chapter-by-chapter to the core text, EAQ prepares students for tutorials, lectures and exams, with access to thousands of exam-style questions at their fingertips

The leading text in pediatric nursing, Wong's Nursing Care of Infants and Children takes a unique, easy-to-understand developmental approach to describe the care of children at each age and stage of development. Childhood diseases and disorders are organized by age groups and body systems, and described through the nursing process framework. This edition includes updates on topics such as the new CPR guidelines, immunizations, and pain assessment and management. Written by pediatric experts, Dr. Marilyn Hockenberry and David Wilson, each with nearly 30 years of hands-on experience, this bestseller provides an evidence-based, clinical perspective that shows how the quality of nursing care can impact quality patient outcomes. A developmental approach addresses the differences at each stage of the child's growth and enables you to individualize care at the appropriate level for each child. **UNIQUE!** Quality Patient Outcomes are discussed for major childhood diseases and disorders, showing how nursing care directly impacts patient outcomes. Nursing Care Plans provide models for planning patient care, with rationales explaining why specific nursing interventions have been chosen, and include nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC

guidelines. A focus on family-centered care emphasizes the role and influence of the family in health and illness with a separate chapter and Family-Centered Care boxes. Critical thinking exercises use case studies to help you test and develop your own analytical skills. Nursing Care Guidelines provide clear, step-by-step, detailed instructions on performing specific skills or procedures. Nursing Tips include helpful hints and practical, clinical information, and Nursing Alerts provide critical information that must be considered in providing care. An emphasis on wellness includes principles of health promotion and injury prevention for each age group. Drug Alerts highlight important drug-related information for safe, appropriate care. Pathophysiology Reviews explain complicated disease processes with illustrated summary boxes. Complementary & Alternative Therapy boxes include timely information on alternative medicine as a part of complete, comprehensive care. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress, and provide guidance for performing procedures in a caring manner. Emergency Treatment boxes serve as a quick reference in critical situations. NEW! NCLEX® exam-style review questions allow you to test your understanding of text content and practice answering application-based NCLEX questions. NEW! Translating Evidence into Practice and Applying Evidence to Practice boxes help you apply research to support, guide, and improve the outcomes of nursing care. UPDATED content includes the new CPR guidelines, pain assessment and management, immunizations, asthma, and updated interventions. NEW! Community and Home Health Considerations boxes focus on wellness information and illness-related topics.

The most trusted authority in pediatric nursing, Wong's Nursing Care of Infants and Children provides unmatched, comprehensive coverage of pediatric growth, development, and conditions. Its unique 'age and stage' approach covers child development and health promotion as well as specific health problems organized by age groups and body systems. Leading pediatric experts Dr. Marilyn Hockenberry and David Wilson provide an evidence-based, clinical perspective based on nearly 30 years of hands-on experience. Easy to read and extensively illustrated, this edition focuses on patient-centered outcomes and includes updates on topics such as the late preterm infant, immunizations, the H1N1 virus, and childhood obesity. A clear, straightforward writing style makes content easy to understand. Unique Evidence-Based Practice boxes help you apply both research and critical thought processes to support and guide the outcomes of nursing care. Unique Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress. Unique Critical Thinking exercises help you test and develop your own analytical skills. A unique focus on family content emphasizes the role and influence of the family in health and illness with a separate chapter, discussions throughout the text, and family-centered care boxes. Nursing Care Guidelines provide clear, step-by-step, detailed instructions on performing specific skills or procedures. Unique Emergency Treatment boxes

serve as a quick reference for critical situations. Unique Cultural Awareness boxes highlight ways in which variations in beliefs and practices affect nursing care for children. A developmental approach identifies each stage of a child's growth. Health promotion chapters emphasize principles of wellness and injury prevention for each age group. Student-friendly features include chapter outlines, learning objectives, key points, references, and related topics and electronic resources to help you study and review important content. A community focus helps you care for children outside the clinical setting. Nursing Care Plans include models for planning patient care, with nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC guidelines. Nursing Tips include helpful hints and practical, clinical information, and Nursing Alerts provide critical information that must be considered in providing care.

The Simulation Learning System (SLS) integrates simulation technology into your pediatric nursing course by providing realistic scenarios and supportive learning resources that correspond to Hockenberry: Wong's Nursing Care of Infants and Children, 9th edition. The SLS offers targeted reading assignments and critical thinking exercises to prepare you for the simulation experience; access to patient data with a shift report and fully-functional electronic medical record (EMR); post-simulation exercises including charting and documentation activities in the EMR, reflective journaling, and concept mapping; and review resources including animations, videos, and textbook references. Simulation with the SLS is a complete learning experience that bridges the gap between lecture and clinicals to prepare you for the real world of nursing. **STUDENT ACCESS ONLY - INSTITUTIONAL LICENSE REQUIRED.**

of a patient and set priorities for care, collect information, analyze and interpret data, prepare and administer medications, and reach conclusions about complex problems. Each lesson has a textbook reading assignment and activities based on "visiting" the patients in the hospital - providing a perfect environment to "practice" what you are learning. Online workbook includes a set of lessons to prepare and guide you through a variety of patient scenarios, which are all connected to your textbook. Physical examination interactions include unique images and assessment findings for each patient scenario. Patient chart provides quick access to vital information such as physician's orders, laboratory reports, patient education, nursing admission, and more, offering a richly detailed portrait of the patient. Electronic patient record houses data from the patient's entire hospital stay and offers the ability to record new data findings. Nurse-client interaction videos depict conversations and situations involving nurses, patients, family members, and hospital staff to help you discern between communications that are ideal and those that need improvement. Updated drug reference includes a comprehensive set of the latest drug monographs to help you make the best clinical judgments involving medication administration. NEW! Online format enables you to access Virtual Clinical Excursions from any PC or MAC with an internet connection. NEW! Laboratory guide provides standard value ranges for all laboratory values offered within the virtual patient hospital, so you can confirm and compare standard lab values against your patients' test results.

This convenient, money-saving package is a must-have for practical/vocational nursing students! It includes Hockenberry's Wong's Nursing Care of Infants and Children, 8th edition text, and Wong's Nursing Care of Infants and Children Virtual Clinical Excursion, 8th edition.

assessment and management approach Foundational information builds a solid knowledge base in paediatric nursing Written to help nurses develop a deeper understanding of the psychosocial needs of infants, children, adolescents and their families Case studies and research questions to build critical thinking skills Aligned to National Safety and Quality Health Service (NSQHS) Standards User-friendly, accessible content suitable for practising paediatric nurses across a variety of clinical settings and geographic locations

Master pediatric nursing concepts and apply them to the practice setting!

Corresponding to the chapters in Wong's Nursing Care of Infants and Children, 10th Edition, by Marilyn Hockenberry and David Wilson, this study guide reinforces your understanding of pediatric nursing with learning activities, review questions, and case studies with critical thinking questions. A variety of question types includes multiple-choice, matching, fill-in-the-blank, short answer, and true/false questions. Critical thinking case studies apply concepts to real-world practice. An answer key is included in the back of the study guide. Perforated pages allow you to submit assignments to your instructor. Key terms are accompanied by definitions and help you learn important terminology.

A most trusted authority in pediatric nursing, this book provides unmatched, comprehensive coverage of pediatric growth, development and conditions. Its unique 'age and stage' approach covers child development and health promotion as well as specific health problems organised by age groups and body systems.

This money-saving package is a must-have for nursing students! It includes Wong's Nursing Care of Infants and Children 8th edition text and an electronic version of the textbook that allows students to search, highlight information, take notes, share notes and more. This package makes it simple for students to make the most of their study time and get more use out of their textbooks!

As the #1 title in the pediatric nursing market for over 40 years, Wong's Essentials of Pediatric Nursing, 11th Edition continues to leverage its trademark developmental approach as it equips readers with the very latest research and guidelines for treating children today. The text utilizes a highly-readable writing style and encourages a whole-body approach — beginning with child development and health promotion to better understand the later chapters on specific health problems. This new eleventh edition also features Next Generation NCLEX®-style case studies and questions, a new chapter covering all systems cancers, additional case studies within the nursing care plans, and updated and expanded evidence-based content throughout to best reflect the latest standards and trends impacting pediatric nursing care today. Developmental approach clearly identifies developmental tasks and influences at each stage of a child's growth. Emphasis on wellness features health promotion chapters for each developmental stage of childhood. Critical thinking case studies with answers are found throughout the text. Quality patient outcomes are highlighted within nursing management discussions for major diseases and disorders. Drug alerts draw attention to potential safety issues, reflecting QSEN safety initiative. Family focus includes a separate family chapter as well as family content and Family-Centered Care boxes integrated throughout the text. Community Focus boxes provide resources and guidance on caring for children outside the clinical setting. Evidence-Based Practice boxes focus attention on the application of research and critical thought processes to
